

The flooring
specialist **WITH**
COMPLETE COVERAGE.

HōM
SOLUTIONS, INC.

When you only need one contractor from the ground up, **POSSIBILITIES BECOME REALITIES.**

HÕM SOLUTIONS is about more than exceptional flooring and service — we're about empowering customers with a one-stop solution that brings ease, efficiency and cost effectiveness in hand. Whether your property is commercial or residential, whether your flooring of choice is carpet, hardwood or stone, our professional design consultants and installers can help you get the job done in-house. HÕM SOLUTIONS offers a vast array of materials and finishes, including ceramic, laminates and vinyl. Regardless of your choice, **our professional installation team is certified with every flooring specialty to ensure the best finish from the ground up.** And if you need to include doors, windows, or even complete kitchens and bathrooms, HÕM SOLUTIONS has the solution. With the time and money you'll save, the finish you imagine can become a concrete reality. (Of course, we handle concrete as well.)

You set a budget and a schedule. THEN WE NAIL THEM.

Because your time and money mean everything, project management is always tangible with H&M SOLUTIONS, from start to finish. We use the latest computerized estimating technology, so you'll know exactly how much the project and the materials are going to cost. We confirm and order your materials well in advance, **then use our own fleet of vehicles to ensure that delivery takes place on schedule,** whether your project involves a small office or a grand ballroom. During installation, we'll hold regular work-in-progress meetings with your staff for timeliness and quality control. To protect your investment, we can even offer material storage at one of our 60,000-square-foot warehouse facilities, while still keeping you on schedule.

Replace the carpeting without moving the furniture. **NO MAGICIAN REQUIRED.**

Desks, chairs, conference tables, sofas, and cubicles — they all get in the way, literally and figuratively. In fact, almost sixty percent of carpet replacement costs have to do with moving furniture. With HŌM SOLUTIONS, nothing has to budge an inch. Using patented *Renovisions*[®] technology, **we can actually lift your furniture and install modular carpeting underneath, without upsetting any power cables, telephone or data lines.** What's more, our staff will install the carpeting after hours so there isn't any downtime during the day. You could save as much as fifty percent on carpet replacement, without any loss in productivity. And you won't have to hire the guy with the top hat, wand and cape.

There are new standards for energy and environmental design. **WE ACTUALLY PUT THEM INTO PRACTICE.**

The nationally certified benchmark for the design, construction and operation of buildings is now green, thanks to the LEED Program (Leadership in Energy and Environmental Design). HÔM SOLUTIONS is doing much more than talking about it — **we're taking root with energy efficient, sustainable and ecologically friendly flooring and installation materials that will help you earn the points you need for LEED certification.** When you choose HÔM SOLUTIONS, you don't just get up to code, you plant the seeds for a green future, with each and every customer.

To put yourself on solid ground, **START BENEATH THE SURFACE.**

It's what's underneath that counts — especially when it comes to flooring. A majority of flooring defects can be traced to water vapor and moisture emissions from the concrete substrate. At HÕM SOLUTIONS, **we begin every project with a thorough test of your concrete, then perform any necessary repairs** to ensure that your flooring will be properly supported and in accordance with the manufacturer's warranty requirements. If more concrete work needs to be done, HÕM SOLUTIONS can also level, smooth, refinish and waterproof so you'll know your investment is on solid ground before the first tile, plank of wood or swatch of carpet comes off the truck.

Whether your project is around the corner or across the country, **WE COVER EVERY SQUARE FOOT.**

At HÔM SOLUTIONS, we're proud to be part of the *Resource Commercial Flooring Network*, one of the most expansive, resourceful and respected national flooring organizations in the country. As a result, there are no barriers to your flooring project, even if your building is thousands of miles from our offices. **We'll always**

have access to the finest tools, resources and materials across the country so you

can take on any job. Yet wherever your flooring project may be, you can expect the

same exceptional planning, attention to detail, craftsmanship and execution that have defined HÔM SOLUTIONS from the beginning.

Look good month after month and year after year **WITHOUT THE NEED FOR EXPENSIVE PROCEDURES.**

Beautiful flooring needs regular maintenance and upkeep to stand the test of time. Fortunately, HŌM SOLUTIONS offers a host of structured plans to choose from — right in house — ensuring minimal cost. And since we can perform cleaning and repairs on any kind of material from any manufacturer, you'll never need an outside contractor to keep your flooring looking its best for the long haul. **Our plans are scheduled to provide optimal maintenance year after year,** with the right products and service for your flooring of choice. What's more, we always use environmentally friendly cleaners and solvents so your office can stay up and running at all times.
